

Who we are

NAVCOR Logistics, LLC is an agricultural cargo observation and logistics company headquartered in McLean, Virginia, with operations centered on the U.S. Gulf Coast and survey coverage across more than forty countries. **Observation is not a side business — it is the business:** independent, documented verification of U.S. agricultural commodities at the loading port, on the vessel, and at the international point of discharge.

Service lines

- Vessel Loading & Unloading Observation (VLUO) — flagship** — independent berth-side observation of bulk, bagged, and breakbulk commodity loading and discharge. Scope: container & railcar observation, breakbulk & bagged monitoring, sampling & damage documentation, and two-stage discharge & delivery surveys (KC-41 / KC-44 / KC-334 form families), CONUS + OCONUS.
- Prepositioning & warehousing** — food-grade, USDA-licensable readiness capacity at U.S. ports; ambient and temperature-controlled storage, rail- and truck-served receipt, lot-level traceability, export staging, and specialized support (repackaging, reconstitution, fumigation) — activated on notice.
- Third-party logistics** — drayage to deep-water ports, container / railcar / breakbulk handling, trailer loading, and export staging, each movement documented and closed out on the record.
- Advisory services** — operating-model design, process guides, commodity and geography analysis, and staff training & handover for federal food-assistance programs.

Differentiators

01 · FOCUS

Single-discipline specialist

Agricultural observation is the entire company — senior attention, process, and technology all point at one job.

02 · PLATFORM

NAVCOR Observer™

Our in-house operations platform: one audit-ready record per shipment, evidence visible as it is taken, escalations on a live clock.

03 · REACH

Gulf to global

U.S. Gulf Coast origin operations and a coordinated network of established survey partners across 40+ countries.

04 · PROOF

Documented, not declared

Defined delivery and escalation windows on every engagement, tracked live against the record and provable under audit.
